

IN THE CLAIMS:

1 – 15. (canceled)

16. (currently amended) A door and frame in combination with an air handling unit fixedly mounted on a fixed structure, the combination comprising:

- (a) a frame;
- (b) a hinged door engageable engageable with the frame, the door further comprising a front wall, rear wall, and side walls enclosing a hollow core and insulating material filling the hollow core; wherein the insulating material is expanding polyurethane foam; and
- (c) a gasket between the door and the frame, the gasket further comprising a flexible gasket wall with anti-roll extensions, and further comprising a friction reducing material on the gasket wall; and
- (d) opposed thermal pockets in the door and in the frame, the thermal pockets being filled with high-density polyurethane.

wherein the door and frame can withstand a pressure differential of greater than eleven inches of air pressure.

17. (original) The door and frame combination of claim 16 wherein the gasket further comprises a central hollow core.

18. (canceled)

19. (original) The door and frame combination of claim 16, further comprising a window in the door.

20. (original) The door and frame combination of claim 16, wherein the side walls are two inches in width.

21. (canceled)
